

Accelerating Regulatory Excellence

The regulatory landscape is evolving rapidly.
Is your Operating Model keeping up with the pace?

October 22, 2026

Princeton, NJ

**An invite-only gathering for leaders shaping
the future of Regulatory, R&D and Technology.**

Regulatory teams are under growing pressure to move faster, navigate greater complexity and turn data and technology into better decisions. The challenge is knowing **what needs to change, where technology can make a meaningful difference, and what is truly ready to scale**. Spend the day with industry leaders and Freyr experts exploring what is working today, comparing approaches with peers, and finding practical answers you can take back to your own transformation priorities.

What to Expect

Key themes we will explore

What should the future Regulatory operating model look like?

How do we move from isolated automation to connected processes?

What can agentic workflows unlock for post-approval change management?

Where can AI and technology make a meaningful difference - and what is ready to scale?

How can Regulatory Intelligence, RIM, data and intelligent agents work together across the enterprise?

What practical lessons can you take from peer transformation experiences?

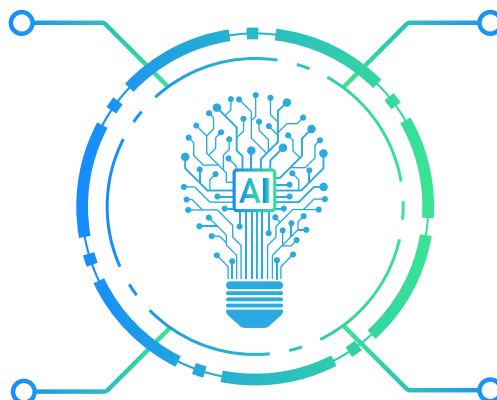

Go beyond the concept and learn from leaders already on the journey, through real-world experiences, practical examples and lessons from organizations putting AI and agentic approaches into practice today.

Innovation Zone

See the ideas in practice

See how RIM, Regulatory Intelligence, data and AI come together to create a more connected regulatory ecosystem.

Experience enterprise Regulatory Intelligence in action - from monitoring change to connecting requirements, insights and intelligent agents.

Explore agentic Post-Approval change management and how intelligent workflows can support the move from identifying change to taking action.

Discuss your own transformation priorities directly with Freyr's regulatory, product and innovation experts.

Be part of what Regulatory becomes next.

Connect with the leaders, ideas and practical approaches shaping the next phase of Regulatory
